METALLURGIA INDEX TO VOLUME 62
JANUARY – DECEMBER 1995

A

Advancing precision forged components 68
Aerospace company improves heat-treatment processes . 277
Aircraft structures, reducing costs 234
Anticipating the hardening response of aluminium-bearing plain-carbon steels 183
Anti noise for foundry fans 251
Asbestos-free high-temperature protection 128
Automated magnetic particle inspection 220
Automatic high-pressure forming 112

B

Bell annealing technology 303

C

Calcium silicate material in induction furnace construction 166
Car bodies — why steel is still dominant 169
Carbon level measurement and control 199
Ceramic coatings for cold forming tools 238
Ceramic-fibre modules 126
Cold Forging Congress 1995 — preview 120
Companies invest for future, Sheffield Forgemasters ... 249
Continuous casting in Asia 110
Contract heat-treater, confident in future 235
Contract heat-treating — a view from America 25
Contract heat-treatment, winners and losers 240
Control and instrumentation — What's new 168
Control gear realises savings 269
Crucible furnaces meet environmental challenge 245
Cryogenic processing, tools, dies 371
Cutting edge technology in vacuum sintering furnaces .. 121

D

Developments in combustion technologies and burners . 263
Die forger conversion units 119
Die surface technology and metal replacement 66
Downweighting of steel autobody components 396

E

Electrical equipment, innovations boost metal industry applications 11
Electroheat, productivity benefits, energy savings 19
Engineering on the move 223
Enhanced resolution video extensometer 390
Expert system endorsed 19
Expert system solving real-time problem 77

F

Fast, accurate analysis of steel rubbings to PPM levels .. 387
Fatigue software 393
Ferrous dust problem solves 251
Foil annealing, gas fired furnace 272
Forging — R&D, process engineering capabilities expanded 28
Furnace operator training 353
Furnaces 95, preview 5
Furnaces 95, showcase 180
Furnaces 95, the biggest ever 41

G

GEM Awards 94 155
Green auto application 386

H

Heat-treat installation stateside 190
High integrity products, metalised ceramics 326
Highly flexible aluminium forging plant 314
High performance aerospace alloy 326
Hot isostatic pressing — International Conference 288
Hot stampings in copper alloys 70

I

India, new powder producer 405
Induction supports foundry operations 156
Inductive heating, thin strip, slab 279
Infra-red linescanning 343
Infra-red thermography development 407
Innovative vacuum melting and heat-treating systems and processes 196
Intermetallic coatings — new research and development 81
International Cold Forging Congress 95 233

J

Japanese forgemasters ultralarge steel products 114

L

Large-scale co-ordinate measurement 221
Laser materials processing — developments 81
Less is not always more 383
Localised corrosion phenomena, predicting, assessing .. 206

M

Magnetic technique improves QM 88
Measurement of residual stress distributions 205
Medium frequency induction melting technology 154
Metal forming — major player in nuclear power industry 106
Metals with superfine, uniform crystal structures 324

N

New furnace design 150
New technologies and flexibility lead to success 65
Non-contact temperature measurement 408
Non-ferrous continuous casting 384

O

Over pressure sintering — investment 158
Oxy-fuel — the next generation 42
Oxygen applications — new standard 152

P

PEP Awards 16
Plasma tundish heater 151
Positive materials identification 85
Pressure diecasting difficult alloys 385
Process control, software 20
Process gas analysis and atmosphere control 200
Profile projectors 222

Q

Quadruple mass spectrometers 394
Quench medium testing developments 186

R

Radiant curing 270
Remelting steel — latest methods 149
Ring roller, installation and performance 63
Rotating quality superalloy 113

S

Scanning acoustic microscope 282
Sealing castings — technology boost 189
SEM analysis improved 138
Separating silicon isotopes 136
Sintering furnace range 163
South America, technology offered 299
South American markets, burner development 302
Staged low NO_x burner demonstrated 265
Superplastic sheet aluminium alloys 130
Surface analysis, 3-D 409

T

Thermal imaging systems 223
Tinning line, controlling 344
Tin R&D body 386
Total solutions, shift in focus 367
Trigger-happy heat-treatment 184

U

UK gas supply market 275
Ultrasonic soldering, electronics industry 287

V

Vacuum furnace, new developments 198
Vacuum sintering furnaces, cutting edge technology ... 300

W

Windows-based thermal-mechanical simulation 391

Supplements 1995

April 1995 issue
9th International Cold Forging Congress 1995
June 1995 issue
Forging Technology — special supplement
October 1995 issue
Contract heat-treatment supplement
November 1995 issue
Forging Technology — Special Supplement
December 1995 issue
Annual Furnaces Supplement

SUPPLEMENT INDEX

A

Air cooled steels for auto components FT18

B

British Standards Update FT9
British Standards Update FT14

C

Calibration furnace extends testing capability FUS12
CHTA Buyers Guide 355
Cold Forgers Tale : Part 1 ..... FT10
Cold Forgers Tale : Part 2 ..... FT4
Cold Forging Congress 95 ..... FT14
Cold forging technology, international co-operation, trends CF6
Cold forgings for automotive industry — 2000AD CF10
Cooling and lubrication systems for semi-hot forging FT17
Continuing investment, Bodycote 352
Control system for radial/axial ring rolling plant FT7

E

Environmental management systems FT14
Electroheat projects, energy savings, production benefits FUS1

F

Forging Equipment Buyers Guide FT17
Furnace Operator Training — Why bother? 353
Future of UK forging industry CF8

I

Improving machinability of steels for precision forgings FT3
In Person — Roger Meacham FT13
In Person — Steve Lovell FT6
Institute activities FT12
International Cold Forging Congress 1995 — Programme CF11
International Cold Forging Congress 1995 — Catalogue CF13

H

Heat-treating high-tensile aluminium components FUS18

M

Market profile for cold forgings CF2
Maintenance-free radiant tube heating system FUS2

N

Nitriding methods for improving performance, forging tools FT11

R

Refractory developments FUS6
Remote control boosts efficiency, safety FUS12

S

Specialised thermal process equipment FUS1

T

The British Cold Forging Group CF9
Thread rolling of forgings FT9
Top industry honour FT13

AUTHOR INDEX

Barker, P. FT9
Bauer, R. Dr. 158
Baumann, C.J. 78
Butler, R.G. 130
Buttle, D. 205
Fellows, M. 66
Field, M. FT10
Finkl, C.W. 72
Forsythe, L. 119
Hearty, C.P. 152
Johnson, I. 166
Keens, P. 42
Millage, B. 353
Miller, L.M. 25
Paterson, T. 150
Reynolds, I.H. FT3
Riches, S. 81
Shipley, D. 85
Stacey, R.J. 130
Strudwick, P. 282
Wilkins, D. 352
